

OSPREY PowerRack™

TOOLS REQUIRED

Installation is blazing fast with only six main components that can be installed using standard hand-held power tools in under one hour!

Tools and Equipment

The OSPREY PowerRack™ is designed for easy assemble, therefore no special equipment is required. The following list of items covers the recommended hand-held tools used for the installation and assembly of the OSPREY PowerRack™. This tool list is a guide only. Individual solar installers and EPCs may find alternative tools and methods that fit their installation needs more effectively.
